Ki no Kenyukai Musubi website

Ki no Kenyukai Musubi (KnKm) are built on the idea that all dojo are completely free and choose their own path. But we share the love for the teaching of Yoshigasaki Sensei.

Part of this is to create mailling lists so all dojos can communicate freely, and to have a website where all dojos and seminars are listed.

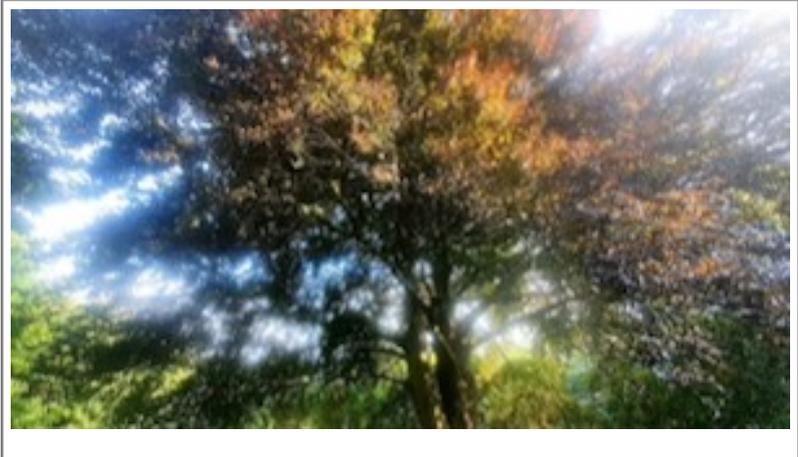

See our website Ki no Kenyukai here:

<https://knkmusubi.net/>

If you want a dojo you want listed or other suggestions please send a mail to info@knkmusubi.net, for now this email is managed by Michael.

For getting a seminar on the page please write to seminars@knkmusubi.net - Lars Häggglund of Sweden will update <https://knkmusubi.net/aikido-seminars/> and Helmut Schweinzer of Germany will update <https://www.ki-aikido.de/en/seminars/all.php>

This means that all Aikido seminars will be listed on both the KnKm and the Ki-Aikido Germany webpages.

Aikido in Real Life

"Create a change to make harmony.

You have to practice developing a sense of harmony, so that you know many ways to create harmony. This is a basic way of any art. That is why Aikido is also an art. In this book you learned many examples of creating these changes. Then Uke's mind changes.

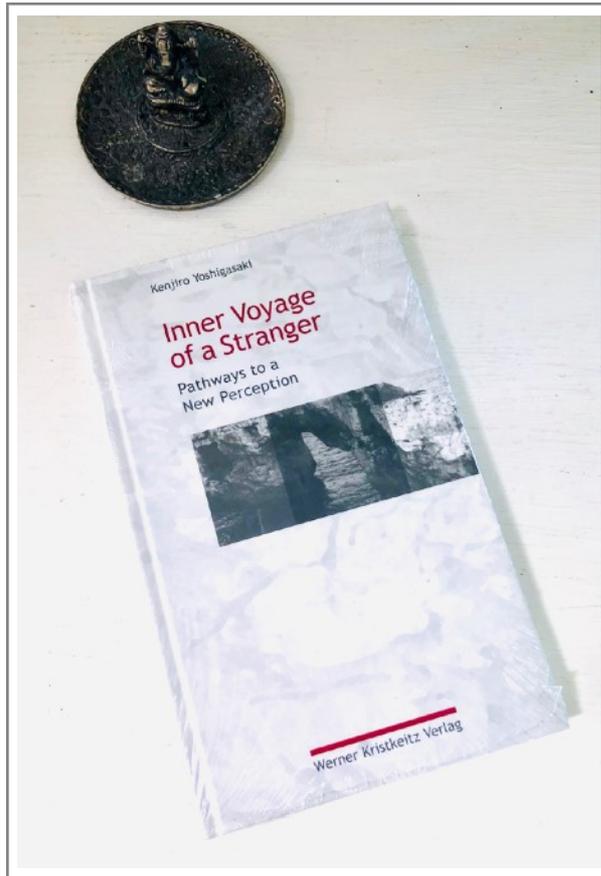

Lead Uke's mind, by creating change in Uke, without collision.

There are two changes, change form and change position. In order not to collide with Uke, you have to change his form without changing his position and then change his position without changing his form. This you have to practice in the dojo.

Continue your life and let Uke also continue his life.

All human beings have a right to create their life. So, you have a right to change Uke's mind so that you can continue your life. Uke also has a right to continue his life, but he must do it without you. Do not try to punish him. You do not have the right to punish anyone. "

It demands a lot of reflection every day to understand life. Life consists of perception and action. Most people, however, only try to control their actions and do not realise the importance of perception for their lives. Every individual's actions at any given moment in time are determined by the way he or she perceives the world. This book is meant for all those who really want to understand life.
